## Experience

### Senior Developer II at Nexient

Los Angeles, Ca. June 2022 - Present

- Collaborated with client partners to define technical requirements and architecture for front-end services, ensuring that solutions meet business goals.
- Leveraged Azure DevOps to build and organize development workflows that optimized code delivery and efficiency. Automated tests within pipeline using Jest and Cobertura to ensure code coverage of >80% for React application.
- Implemented Lambda functions within a serverless application, integrating with Cognito User Pools to deliver secure and scalable user authentication and authorization capabilities.
- Led a front-end engineering team consisting of 5 engineers. Additionally, prepared and delivered bi-monthly reports, providing insights and updates on project progress to stakeholders and senior management.

### Full Stack Engineer at Frank

Los Angeles, Ca. July 2020 - May 2022

- Architected and developed feature rich customer relationship management system, allowing contractors to create, manage and distribute estimates more efficiently.
- Automated build, test, and deployment processes for Web Application and REST API code via CI/CD pipeline utilizing Webpack, Docker and AWS Services.
- Coordinated with product managers to refine features and prioritize tasks by creating biweekly sprints through Jira services, which encouraged flexibility and focused output.
- Conducted biweekly code reviews with engineers to improve code quality and ensure application structures and conventions were maintained.

### Full Stack Engineer at Original Eye

Los Angeles, CA. January 2019 - January 2020

- Developed and shipped modern web applications for the e-commerce platform using popular frameworks including React, GraphQL, and SASS.
- Designed and developed in-house content management system for managing inventory, tracking orders, and automating customer communication.
- Integrated Stripe API for payment processing and delivering sales analytics through a dashboard interface.
- Wrote unit tests for React.js and Node.js applications using popular libraries such as Jest, Enzyme, Mocha, and Supertest.

### Web Developer at Fig

San Diego, Ca. January 2017 - March 2018

- Developed front-end and back-end services for the social networking web application using PHP, Javascript, jQuery, and MySQL.
- Coordinated with a team of designers to create modern and reusable UI/UX elements and increase user engagement.
